

Ensuring security with access control

Meteor Court Office Park is situated within the Barnwood Fields development, a popular and thriving business centre within easy reach of Gloucester and Cheltenham.

The office park is owned by Workham European Properties Ltd who have refurbished the offices to a high standard, and with adjacent parking, the offices represent excellent value for money in an accessible and convenient location.

Motivation

Workham European Properties were advised by their insurers that the entry door to each office building should be secured with a keyfob access control system and automatically close after use. As each building houses multiple tenants, Workham decided to add further value for their tenants by installing an audio intercom system so that each tenant could remotely open the entry door for visitors.

Reward

Controlsoft Security supplied a Solo Standalone Access Control system with Audio Intercom to facilitate:

- **Improved security** - Only authorised people can enter or exit.
- **Combats theft and fraud** - reduces the cost and risk of losses to both landlord and tenant caused by unauthorised access.
- **Time Saving** - Tenants don't have to leave their offices while they go and answer the door to visitors.
- **User-friendly system** - for enrolling people. The Solo Access Control system has a 999-user capacity and a users keyfob can be enrolled in 5 seconds or less.

Implementation

It only took JLEC, a local Controlsoft approved installer, one day to install the system. All the required users keyfobs were enrolled simply and easily at the door proximity reader. It only took about 5 seconds per person to enrol them on to the system.

Review

An access control system was specified by the Insurance Company as a "must have". Dominic White, Managing Director of Workham European Properties had used a Controlsoft access control system when picking up his own children from a local day nursery so he knew Controlsoft offered a reliable solution.

Dominic White says "I am very happy with the Controlsoft access control system. It delivers exactly what we were looking for—a reliable yet easy to use system for both the landlord and our tenants. And most importantly our insurers are happy!"

Fact File

Client	Workham European Properties Ltd
Installer	JLEC
Type of site	Commercial Offices
Type of system	Solo Standalone Access Control with Audio Intercom
